Interpreting ACT Aspire Score Reports

- Where does the student stand right now?

  The student's score is found in two places.

  The green line denotes the ACT Readiness Benchmark

  The national average is found in two places.

  Percentile rank compares the student to other students in their grade level.

  EXAMPLE: This student did better in math than 29% of 8th graders in a national sample.

- How can I make goals for the future?

  This identifies the student's level of need for intervention.

  This is the student's "zone of development," the amount of growth they could have with the right support.

  The report suggests specific skills that need to be addressed in student's lowest performing area
